RE: Free Broadband - Docket # 07-16

Dear Chairman Martin:

As a Parks and Recreation Commissioner for The City of Corona I oversee a wide range of programs offered to the residents of our City. A constant problem we face as a City is that many of the people we serve are simply not aware of the services we offer. One major reason for this is that a great many of those who would benefit most from our programs cannot access information via the Internet. In fact, I was surprised to learn that, nationwide, only 42 percent of homes have broadband connections. For many the cost of web-based communication is just too high.

Recently, I came across an article about M2Z's efforts to deliver fast, free, and family-friendly broadband access across the nation. I believe this is a wonderful opportunity for the community to be able to access an array of new and essential resources.

I believe that M2Z's program for free Internet access will help our communities stay up to date on education, business, and recreational information. I proudly indorse the M2Z plan for free Internet access and ask you to support it as well.

Sincerely,

A handwritten signature in black ink, appearing to read 'Phil Breitenbucher', is written over a horizontal line.

Phil Breitenbucher
Parks and Recreation Commissioner, City of Corona
